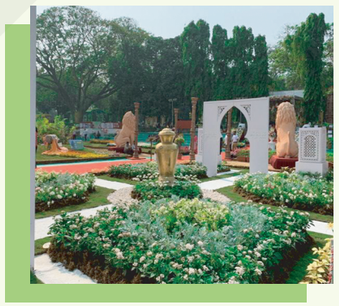
QUICK ESTIMATE RESPONSE TIME

Get in touch with us today and LEAVE the responsibility of transforming any and every space that you want to, into the greenest landscape. Given our commitment to provide all our clients with the best service, we ensure fastest response to all your enquiries related to budgeting and information for all types of landscaping projects

SERVICES

1.Landscaping and Gardening

It's a service where we effortlessly fuse the physical aspects of the space to be transformed, with elements of nature that will not only complement, but also beautify any kind of environment. Our work begins at ideation and ends at the completion of the project, this process includes, civil work, fabrication work, irrigation, all electrical requirements as well as various other jobs that are an integral part of creating a spectacular landscape. We always create in collaboration with the client, to create a unique and customized product to their liking.

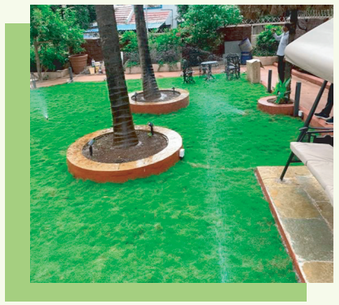


2. Plant Supply

We not only execute creation of landscapes, but also, supply plants of any and every variety based on our clients' needs and requirements. Our own plant nursery enables us to supply a huge variety of plants at competitive rates and all over the country.

3. Irrigation

Based on the size and type of your landscape, our team can install an irrigation system that best suits your botanical terrain. We provide our clients with the best options based on their budget, requirement and an irrigation facility that will help keep their landscapes and gardens, lush and healthy, come rain or shine.



4. Vertical Gardening

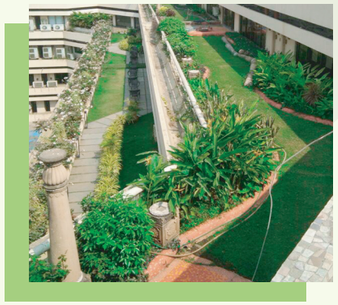
Also known as bio walls, green walls, living walls or eco-walls, Vertical Gardens are clusters of plants that are grown vertically on free-standing structures or walls. Vertical Gardening is the future of Gardening, given the high-paced growth of urbanization combined with the need to lead sustainable lifestyles

5. Plant Nursery

Experience of almost 25 years as horticulturists and our own Plant Nursery at Karjat, where we grow innumerable ornamental plants, which has provided us with the expertise required to create and maintain plant nurseries in a scientific and systematic manner

6. Terrace Gardens

Besides the aesthetics that a Terrace Garden imparts to a house, it is also a way of helping every plant-lover living in the cramped cities to achieve their desire of having their own green corner within the comfort of their own homes.



7. Fountains and Waterfalls

A magnificently curated fountain or waterfall has the potential of bringing together an entire landscape. We at 7 Petals pride ourselves for conceptualizing and creating highly-customizable fountains as well as waterfalls for any larger sized landscapes
